TRANSPORE()N
transforming transportation

Transporeon
Trust Center

Our Transporeon Trust Center (TTC) promises to become the most complete Carrier profile overview in Europe. Integrated fully into the Transporeon platform, the TTC is a centralized platform to verify and manage your work with Carriers. Store documents, access data, and streamline your compliance process in one centralized location.

CHALLENGES

TIME-CONSUMING COMPLIANCE MONITORING
Keeping Carrier information up to date is time-consuming, manual, and makes thorough compliance monitoring extremely costly.

NO ACCESS TO A CENTRAL STORAGE FOR CARRIER INFORMATION
A lack of compliant and accessible digital storage options means Carrier information is often collected and stored offline, making it inaccessible and hard to update.

SLOW AND MANUAL PROCESS
Without a proper tool, evaluating and comparing Carriers across your required criteria is a slow, manual process.

FEATURES

CENTRAL PLATFORM LOCATION AND INTEGRATION
All information can be retrieved by all Transporeon models, including verified profile information for Carriers during tendering and contract information during signing.

OVERVIEW OF KPIS AND QUALITY RANKING
Carrier data is already available and ready for cross-comparison, including performance data like service level and on-time statistics.

DIGITAL MANAGEMENT OF COMPLIANCE INFORMATION
All compliance information is stored in one convenient location.

BILATERAL EXCHANGE OF CONTRACT DOCUMENTATION
Send and receive documents and messages in one easy-to-access location.

COMPREHENSIVE CARRIER PROFILES
Get integrated data on all transport execution including transport assignment, booking data from the TSMs, visibility data from Sixfold, and more.
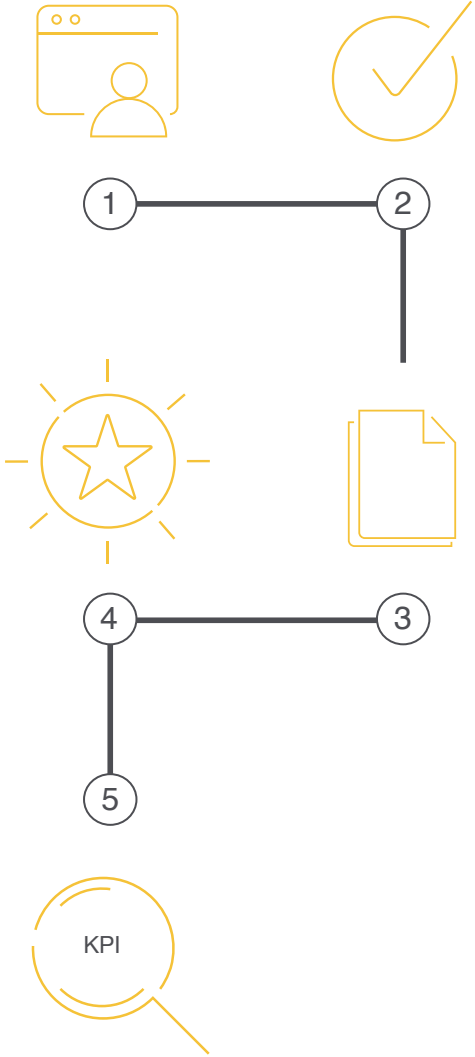

HOW IT WORKS

1

Activate your Transporeon Trust Center (TTC) Account on the Transporeon Platform

2

Accept the terms and conditions

3

Check insurance documents, licenses and other documents with your Logistic Service Provider (Carrier) via the TTC

4

When documents expire, you will get an automatic notification

5

Check your logistics KPIs

BENEFITS

❯ Single storage point for all documents and contracts

❯ Central platform location and integration for tendering and allocation

❯ Get reminders about expiring contracts for all involved parties

❯ Improve transparency and fairness in business relationships

❯ Properly managed carrier pool

❯ No need to think about "compliance issues", e.g. if carrier has all required and valid licenses
